

Greetings to you in the name of our Lord and Savior Jesus Christ. I hope all is well with you, both spiritually and physically. I am also doing well here, by the grace of the Lord.

I am currently doing my clinical attachment in St. Anthony's Hospital in Dzodze in the Volta Region of Ghana. The hospital renders both orthopedic and physical therapy services, and is the major referral center for orthopedic cases in and around the region. They also treat club foot cases. It is indeed a great opportunity for me, observing and learning about treatments for fracture cases, club foot, and other birth deformities in children. It is quite an inspiring time for me because I learn something new almost every day.

The clinical attachment period ends on the 5th of August, and school resumes on the 12th of August 2017.

I am so excited and grateful to God for this grace. My heart is also filled with joy and gratitude to you and your team for all the help you give me. You have made all these possible, and for that, I am eternally grateful. May the Lord my God, bless and replenish you all abundantly far above measure.
