The AsOne Bakery

ABOUT:

The Women's Bakery offers women access to business education, life skills, and applied baking and nutrition skills. From this, social and economic empowerment are born. We've failed and got back up again. Alongside this group of women we have seen the essence of empowerment grow out of their aspiration to become "business-women." This a project that has intentional goals of economic sufficiency through selling approximately 450 pieces of bread per day.
